

You are creating a website!

www.weebly.com

Username: taylor.misleovich@eldonmustangs.org

Password: eldon7678

Your website should include the following pages:

1. Introduction page (This page should give a brief overview of your website. Include your first names on this page as the creator. **FIRST NAMES ONLY.**)
2. Spheres/Biotic & Abiotic Factors/Biome: **Define spheres, biotic, abiotic, and biome.** Choose one biome and state the different biotic and abiotic factors in this biome. Describe your biome.
3. Levels of Organization: **Define biosphere, ecosystem, community, population, organism.** Begin with describing your ecosystem then simplify to your community, then population, and finish with a specific organism from your biome.
4. Food Chains and Food Webs: **Define** and create examples from your biome covering realistic food chains and webs that exist there. Include at least 3 food chains.
5. Taxonomy and Adaptations: **Define and describe taxonomy and the different types of adaptations.** Choose three organisms from your biome. State their classification using taxonomy. State the organism's physical (3) and behavioral (2) adaptations.

Each web page should include a maximum of four **RELEVANT** images.
